

CS3009-Software Engineering

Software Testing Phase

Project Name: Songify (Android Music Player Application)

Group Members:

Faizan Shabir 22L-6552 6H

Ahmed Mukhtar 22L-8225 6H

Tahawar Ali 22L-6761 6H

Test Case ID	1
Purpose	User shall be able to access the songs in the phone's storage.
Input Data	User taps the 'allow' option when the app asks for permission to access audio data in the phone the very first time the app is opened.
Expected Output	User should be able to play all the songs that are in their phone's storage.
Actual Output	User is be able to play all the songs that are in their phone's storage.
Result	Pass

Test Case ID	2
Purpose	User shall be able to open the sliding menu on the home screen of the application.
Input Data	User clicks the 'hamburger' icon on top left of the home screen or swipes right from the left edge of the home screen.
Expected Output	Sliding menu should appear on the screen.
Actual Output	Sliding menu appears on the screen.
Result	Pass

Test Case ID	3
Purpose	User shall be able to change their app theme to different colors including the dark theme.
Input Data	User clicks the 'hamburger' icon on top left of the home screen or swipes right from the left edge of the home screen, taps the 'theme settings' option and then selects his desired theme.
Expected Output	App should restart and the theme should be updated.
Actual Output	App restarts and the theme is updated.
Result	Pass

Test Case ID	4
Purpose	User shall be able to access the 'about' page.
Input Data	User clicks the 'hamburger' icon on top left of the home screen or swipes right from the left edge of the home screen and taps the 'about' option.
Expected Output	About window should appear with the details of the creators of the app.
Actual Output	About window appears with the details of the creators of the app.
Result	Pass

Test Case ID	5
Purpose	The user shall be able to exit the app.
Input Data	User clicks the 'hamburger' icon on top left of the home screen or swipes right from the left edge of the home screen, after that the sliding menu shows and then the user taps the 'exit' button to exit.
Expected Output	The application should terminate.
Actual Output	The application terminates.
Result	Pass

Test Case ID	6
Purpose	User shall be able to find their desired track in the entire library.
Input Data	On the home screen, user taps the search bar and then types the name, album or the artist's name.
Expected Output	User shall get the track(s) from his library, if they exist, and be able to play those tracks.
Actual Output	User gets the track(s) from his library and is able to play those track(s).
Result	Pass

Test Case ID	7
Purpose	User shall have the option to play their tracks in a shuffled mode.
Input Data	If on home screen, the user taps the 'shuffle' icon on the top left. If on playlist screen, the user taps the 'shuffle' icon in the bottom right.
Expected Output	After one track ends, another random track from the library/playlist should play.
Actual Output	After one track ends, another random track from the library/playlist is plays.
Result	Pass

Test Case ID	8
Purpose	User shall be able to create a playlist.
Input Data	On the home screen, user taps the 'playlist' Icon then press the '+' icon in the bottom right and after that a window appears where the playlist information (playlist name and user name) is typed in, after that the user taps the 'add' button.
Expected Output	On the playlists screen, the newly created playlist should appear.
Actual Output	On the playlists screen, the newly created playlist appears.
Result	Pass

Test Case ID	9
Purpose	User shall be able to delete a playlist.
Input Data	User taps the 'playlist Icon' on the home screen and is taken to the playlists screen where all the playlists are listed, the user can delete a playlist by tapping the 'bin' icon within the playlist widget.
Expected Output	In the playlists screen, the deleted playlist should no longer be visible.
Actual Output	In the playlists screen, the deleted playlist is no longer be visible.
Result	Pass

Test Case ID	10
Purpose	User shall be able to add or delete tracks from a playlist.
Input Data	User taps the 'playlist' Icon on the home screen and is taken to the playlists screen, then the user taps on his playlist and after the new window appears, he can tap the 'add/remove' icon in the bottom left, which would take the user to the library window where all the songs are listed, the user can select songs to add or delete from the playlist.
Expected Output	The playlist should be updated according to the user's input.
Actual Output	The playlist gets updated according to the user's input.
Result	Pass

Test Case ID	11
Purpose	User shall be able to play and pause a song from the player screen interface.
Input Data	On the player screen, user taps the 'play' icon to resume playback, and taps the 'pause' icon to pause it.
Expected Output	Music should start playing when 'play' icon is tapped and pause when 'pause' icon is tapped.
Actual Output	Music starts playing when 'play' icon is tapped and pauses when 'pause' icon is tapped.
Result	Pass

Test Case ID	12
Purpose	User shall be able to skip to the next track from the player screen interface.
Input Data	On the player screen, user taps the 'next' icon while a song is playing.
Expected Output	The player should start playing the next song in the current playlist or library.
Actual Output	The player starts playing the next song in the current playlist or library.
Result	Pass

Test Case ID	13
Purpose	User shall be able to go back to the previous track from the player screen interface.
Input Data	On the player screen, user taps the 'previous' icon while a song is playing.
Expected Output	The player should start playing the previous song in the current playlist or library.
Actual Output	The player starts playing the previous song in the current playlist or library.
Result	Pass

Test Case ID	14
Purpose	User shall be able to toggle the repeat mode.
Input Data	On the player screen, user taps the 'repeat' icon.
Expected Output	If the repeat mode is previously set it should unset and current song should not repeat and if the repeat mode is not set it should set and the current song should repeat.
Actual Output	If the repeat mode is previously set, it unsets and current song does not repeat and if the repeat mode is not set, it sets and the current song repeats.
Result	Pass

Test Case ID	15
Purpose	On the player screen, the user shall be able to use the seek bar to jump to a different point in the current track.
Input Data	User drags the seek bar thumb to a new time position while a song is playing.
Expected Output	Playback should jump to the selected time and continue from there.
Actual Output	Playback jumps to the selected time and continues from there.

Test Case ID	16
Purpose	User shall be able to pause and play the song through the notification widget.
Input Data	User slides the top of the phone's screen downwards to bring down the status bar, within the notifications, at top should be the music app widget, in that widget the user can tap the 'play' icon to play and the 'pause' icon to pause the music.
Expected Output	The music should start playing when 'play' icon is tapped and music should pause when 'pause' icon is tapped.
Actual Output	The music starts playing when 'play' icon is tapped and music pauses when 'pause' icon is tapped.
Result	Pass

Test Case ID	17
Purpose	User shall be able to move to the next track or the previous one through the notification widget.
Input Data	User slides the top of the phone's screen downwards to bring down the status bar, within the notifications, at top should be the music app widget, in that widget the user can tap the 'forward' icon to play the next track in order and the 'previous' icon to play the previous track.
Expected Output	The track should change accordingly to the user inputs.
Actual Output	The track changes accordingly to the user inputs.
Result	Pass

Test Case ID	18
Purpose	User shall be able to control the current playing song timeline/seek bar through the notification widget.
Input Data	User slides the top of the phone's screen downwards to bring down the status bar, within the notifications, at top should be the music app widget, in that the user manipulates the seek bar to and fro.
Expected Output	The playback position of the song should change according to the changes made by the user.
Actual Output	The playback position of the song changes according to the changes made by the user.
Result	Pass
